Hamza Abdallh Abualhija

hamzaabualhija03@gmail.com 0791752214 Irbid, Jordan

Profile

A motivated and ambitious Software Engineering graduate with a strong foundation in software development, problem-solving, and database management. Quick to learn and adapt to new tools, with excellent teamwork and communication skills. Eager to grow professionally and contribute to impactful technology solutions.

Education

Software Engineering, *Jadara Uneversity* 03/2021 – 07/2025
GPA (3.2/4) Rating (Very Good) Irbid, Jordan

Certificates

Ana Usharek Fellowship Program
2024/2025

Projects

AI HealthCare Diagnosis System 2025
AI-Powered Healthcare Diagnosis System Developed a bilingual (Arabic/English) healthcare diagnosis web application that leverages Natural Language Processing (NLP) and Machine Learning (SVM, Logistic Regression, Neural Network, Random Forest, KNN) to predict diseases (COVID-19, Flu, Cold, Allergy) from user-entered symptoms, including colloquial Arabic expressions. Built a colloquial-to-symptom mapping module (colloquial_to_symptom) to normalize informal Arabic inputs (e.g., "ناشف حلقي " → SORE_THROAT). Designed the system with a React.js frontend and Flask/Python backend, connected via RESTful API. Implemented ensemble learning (the most repeated) to enhance prediction accuracy. Provided treatment recommendations (medical & natural remedies) and referral to relevant clinics. Delivered a modern, responsive UI with bilingual support and light/dark modes.
